React NATIVE Speaker

Work Experience

● **React Developer** SEPT 2022 - present
Ruptok Fintech

- Created Admin Panel from scratch independently for there P2p Mobile application using react for management of data of the customers.
- Making WEB-APP with team same as mobile application for customers to sell and bid the products and can manage their activities, which is scalable.

● **React Native Developer** JUL 2022 - SEPT 2022
Squareware

- Worked with the team to convert design into code and created apps using expo.
- I made apps for both Android & IOS.
- Used Figma and other technologies for better interface.
- Used Firebase for authentication.

● **React Native Developer** JUL 2022 - SEPT 2022
(INTERNSHIP)
AndWeMet

- Built their App "Andwemet" from scratch.
- Integrated the backend with frontend for all the functionalities.
- Used Figma for UI and Prototype.
- Tested the app in different test cases.
- Developed the Responsive UI, which works on all screen sizes.

● **React Native Developer** Apr 2020 - Nov 2021
(INTERNSHIP)
Redpositive

- Created Cross-platform Mobile Applications From scratch.
- Used multiple libraries such as chart kit for graphs and redux for global store.
- Given KT sessions to other interns and guided them.
- Tested in multiple devices of different screen size and versions.

PROJECTS

● **Dev Connector (social media web-app)**

MERN stack

- The web app was built on MERN stack.
- The app is use to connect developers across the web.
- By creating profile you can add about you, experience, education, links, skills etc, you can even post something on feed which others can like or comment on.
- You have option to delete the things in the web app.
- Hosted on heroku.

● **codeujjwal (portfolio website)**

React JS

- Created my own online portfolio named as codeujjwal.
- Motive of this project is to create better online presence and share profile to anyone easily.
- Added my CV link and all social media links with experience and education details.

● **Clones (netflix, amazon, whatsapp)**

React JS & Firebase

- (NETFLIX) -- Built the Netflix UI from scratch and used IMDB API for the movies and shows images.
- (AMAZON) -- Built the amazon clone with features like add to cart, login, add address and view orders.
- (WHATSAPP) -- Built Whatsapp clone, Used the UI of Whatsapp for the chat app using react and real-time database of firebase and email authentication for details

● **More Projects can be seen on my Github Profile -- [codeujjwal](#)**

EXTRAS

● **Freelance Developer**

- Worked for multiple clients as a freelance developer.
- made 3 successful projects as a freelance developer.
- MERN stack is used in the development and hosting services of netlify and heroku.

● **President of club (MIND OPTIMIZERS)**

- Founder and President of the community in my college.
- Started this club to mentor and guide students on all the domains by their seniors and mates.
- Conducted 4-5 successful events in which the average number of participants were 100+ students.
