SKILLS

React Native   **React JS**   **Javascript**

Git and Github   **CSS**   **HTML**

Node JS   **JSON**

PROJECTS

Dev Connector (social media web-app)

- This web app is built on MERN stack.
- Can be used to connect developers across the web.
- By creating profile you can add about you, experience, education, links, skills etc,
- you can even post something on feed which others can like or comment on.
- you have option to delete the things in the web app.
- hosted on heroku.

Burger Builder

- It is built with the React and firebase.
- It is used to order burger and customize visually.
- You can signIn in the app to place order and add address and see previous orders.
- firebase authentication service is used to login via email or gmail.

codeujjwal (Portfolio)

- Created my online portfolio named as codeujjwal.
- you can visit it by googling codeujjwal.
- Built with React and hosted on netlify.

Clones (NETFLIX, AMAZON, WHATSAPP)

- Built the Netflix UI from scratch and used IMDB api for the movies and shows images.
- Built the amazon clone with features like add to cart, login, and some more
- Built Whatsapp clone, Used the UI of Whatsapp for the chat app built on web

More Projects can be seen on my github codeujjwal

ONLINE PROFILES

Linkedin   github   Porfolio

CERTIFICATES AND HONORS

React Native Speaker

- Conducted a workshop on React native, Taught and guided students on mobile app development

React JS Speaker

- Conducted a workshop on React JS, Taught and guided students for web development using react js

front end web development Speaker

- Conducted a workshop on Front-end development, Taught and guided students on front-end

React - the complete guide (Hooks, Redux, Route)

- Course by Udemy for React

JavaScript- Advanced

- Course by Udemy on Javascript

Complete front end web development

- Course by Udemy.
- covered HTML, CSS, JS

SIH internal hackathon

- Presented idea in SIH and got selected for external round after internal hackathon

---

EXTRAS

Freelance web Developer

- Worked for clients as a freelance developer.
- constructed 3 successful projects as a freelance developer.
- MERN stack is used in the development and hosting services of netlify and heroku

Head of the club
MIND OPTIMIZERS

- Founder and head of the club in college.
- started this club to mentor and guide students on all the domains by there seniors and mates.
- conducted 4-5 successful events in which the average participation is 100+ students.
